

Mostly webdesigns, sometimes game designs

My specialization are websites, including information architecture and copywrite. I have been working as a freelancer for 6 years, through that time I was collaborating with three graphic Studios, especially on advertising campaigns. I studied at Tomas Bata University - Faculty of Multimedia Communications in Zlín as a digital designer, thanks to which I extended my knowledge of the available technologies.

I am currently in the process of transforming my hobby into a gainful activity. My love for video and board games lead me to digital painting area where I try to develop and improve. My particular interest is mainly in concept art and matte painting.
