Tooda
Tooda was a planet located in the Kasha system and the cold hemisphere of the Whiplash. It was located in the Slice.
While the world imported low technology, it never developed a technological base, even after it came into contact with the outside galaxy.

The green signifies the small summer period in which Tooda grows its grain crops. It's during this period in which most of the inhabitants of the planet come together peacefully.

The Whiplash rule over Tooda in small independent tribes. During intertribe wide relations however, the Whiplash adopt a united front in the form of the colour blue.

The three circle graphics are symbols which have been given to the Whiplash over time. It is thought to represent the icy winds which circle Tooda.

03:23 Migrant crisis: 'EU cannot take any more refugees'

European countries cannot accept any more refugees, the French prime minister has been quoted as saying. Manuel Valls said stricter control of the EU's external borders would determine the bloc's fate, in comments published by the Sueddeutsche Zeitung. Europe's border controls have come under renewed scrutiny since the attacks in Paris on 13 November.

03:23 European Commission chief Jean-Claude Juncker has said that the Schengen agreement is "partly comatose". Several EU countries have imposed border controls in recent week - despite the Schengen system of passport-free movement - amid the arrival of hundreds of thousands of migrants, many of whom are

Some countries imposed new restrictions after a forged Syrian passport was found next to the body of one of the perpetrators involved in the Islamic State attacks on the French capital. Prime Minister Valls told the Sueddeutsche Zeitung Europe had been stretched beyond its limits by the migrant crisis. "We cannot accommodate any more refugees in Europe, that's not possible," he said, adding that tighter control of Europe's external borders was needed.
