Tuna Fish and its derivatives, such as Muxama and Estupeta present themselves unavoidably as a reference to the town Vila Real de Santo Antonio. A local gastronomic tradition, highly valued, appreciates both delicacies for their characteristic sensory attributes. This work aims to create a unifying brand for all this tradition and experience, commercially channeling the products for today's demanding market.

HUNGER CHAIR

Shortage versus surplus was the major impetus of creating the "hunger chair". I was inspired by the morphology of the word "fork". I deliberately overexposed the legs of the "hunger chair", thus preventing the shape of the fork from being fully saturated.

Using this technique, I am trying to address the unbalanced distribution of food in the world, where people feast on one side and starve on the other.
