

what is CHAOS?

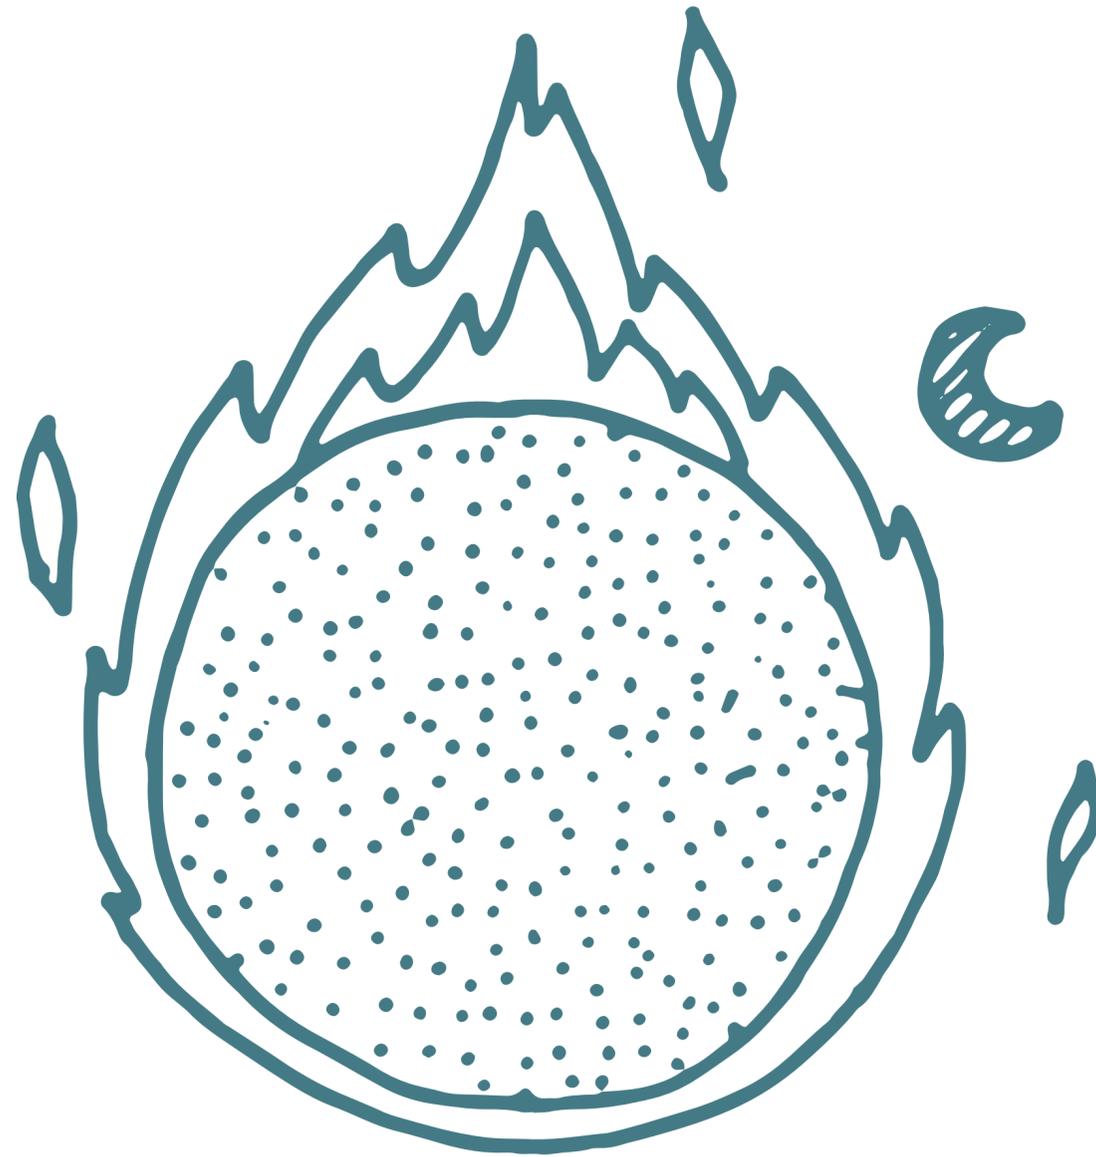

it may just be random mess

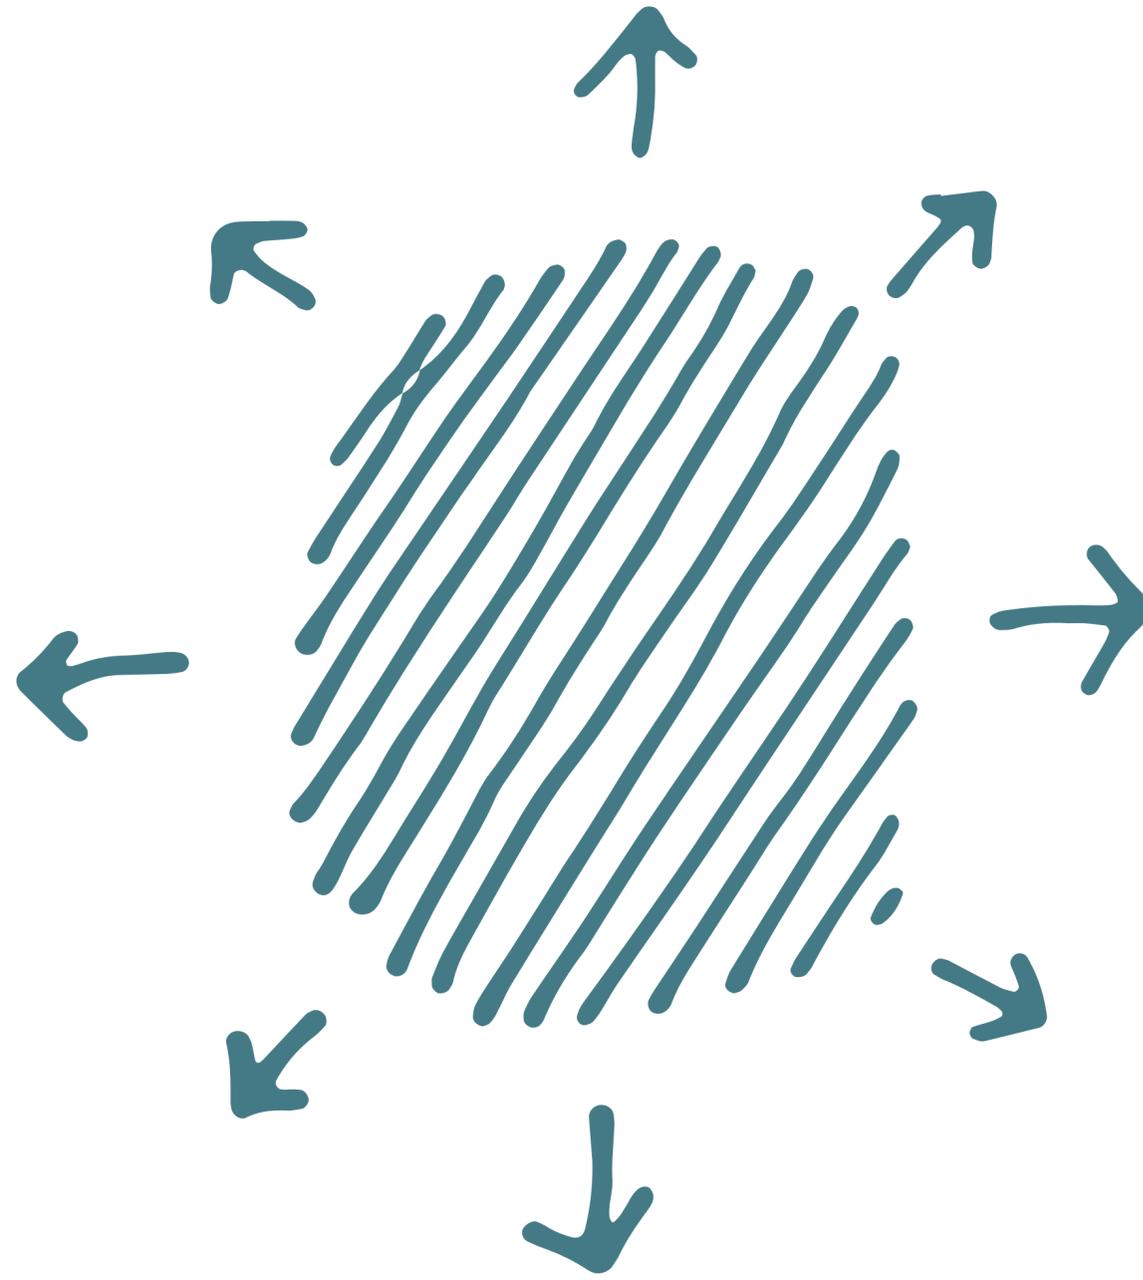

it may be state before God created the earth

it may be visual smog that we see every day in the streets

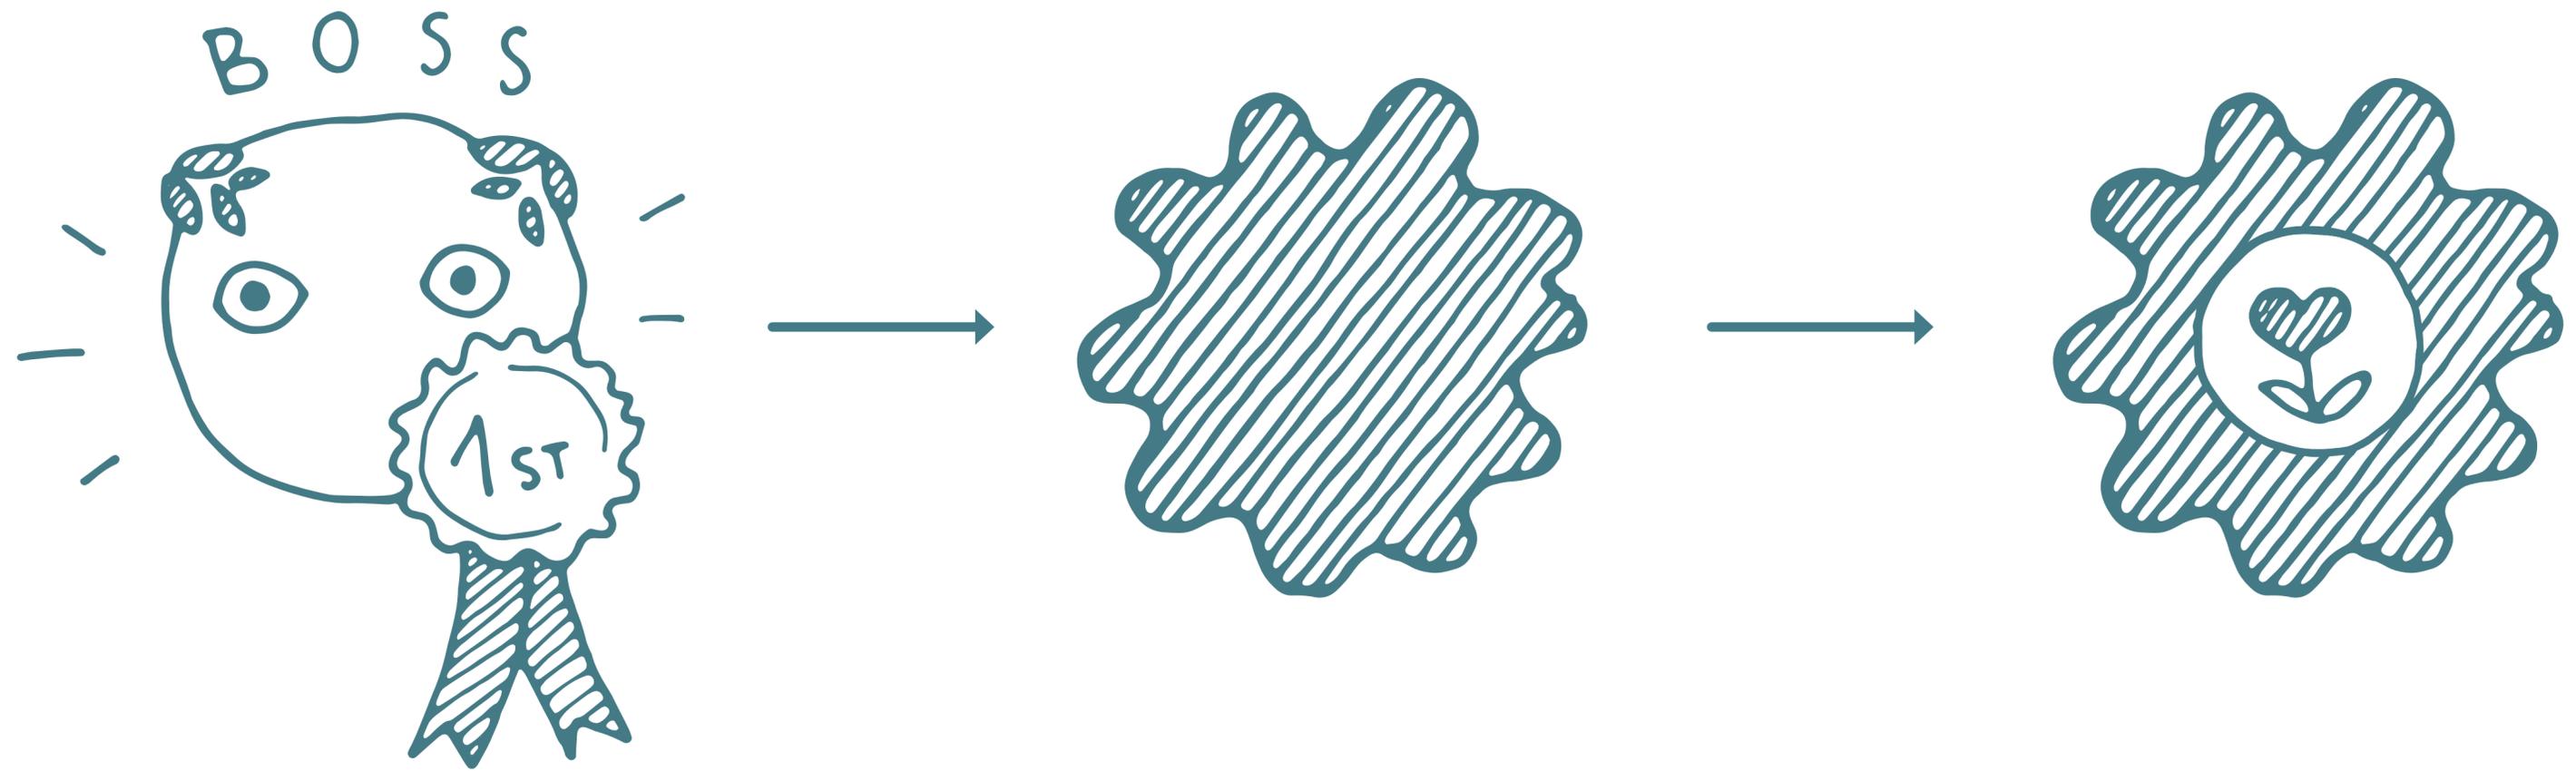

chaos is the initial state of our planet

or it is infinite void

**BUT word chaos comes from greece
so i decided to illustrate first god in greece mytology Khaos**

**chaos was nondescript space, mass which was hiding inside
love and life**

chaos was divided into darkness, love, earth and sky and so the world

and this is how I imagine Mr. CHAOS
