EDUBOX

EDUBOX

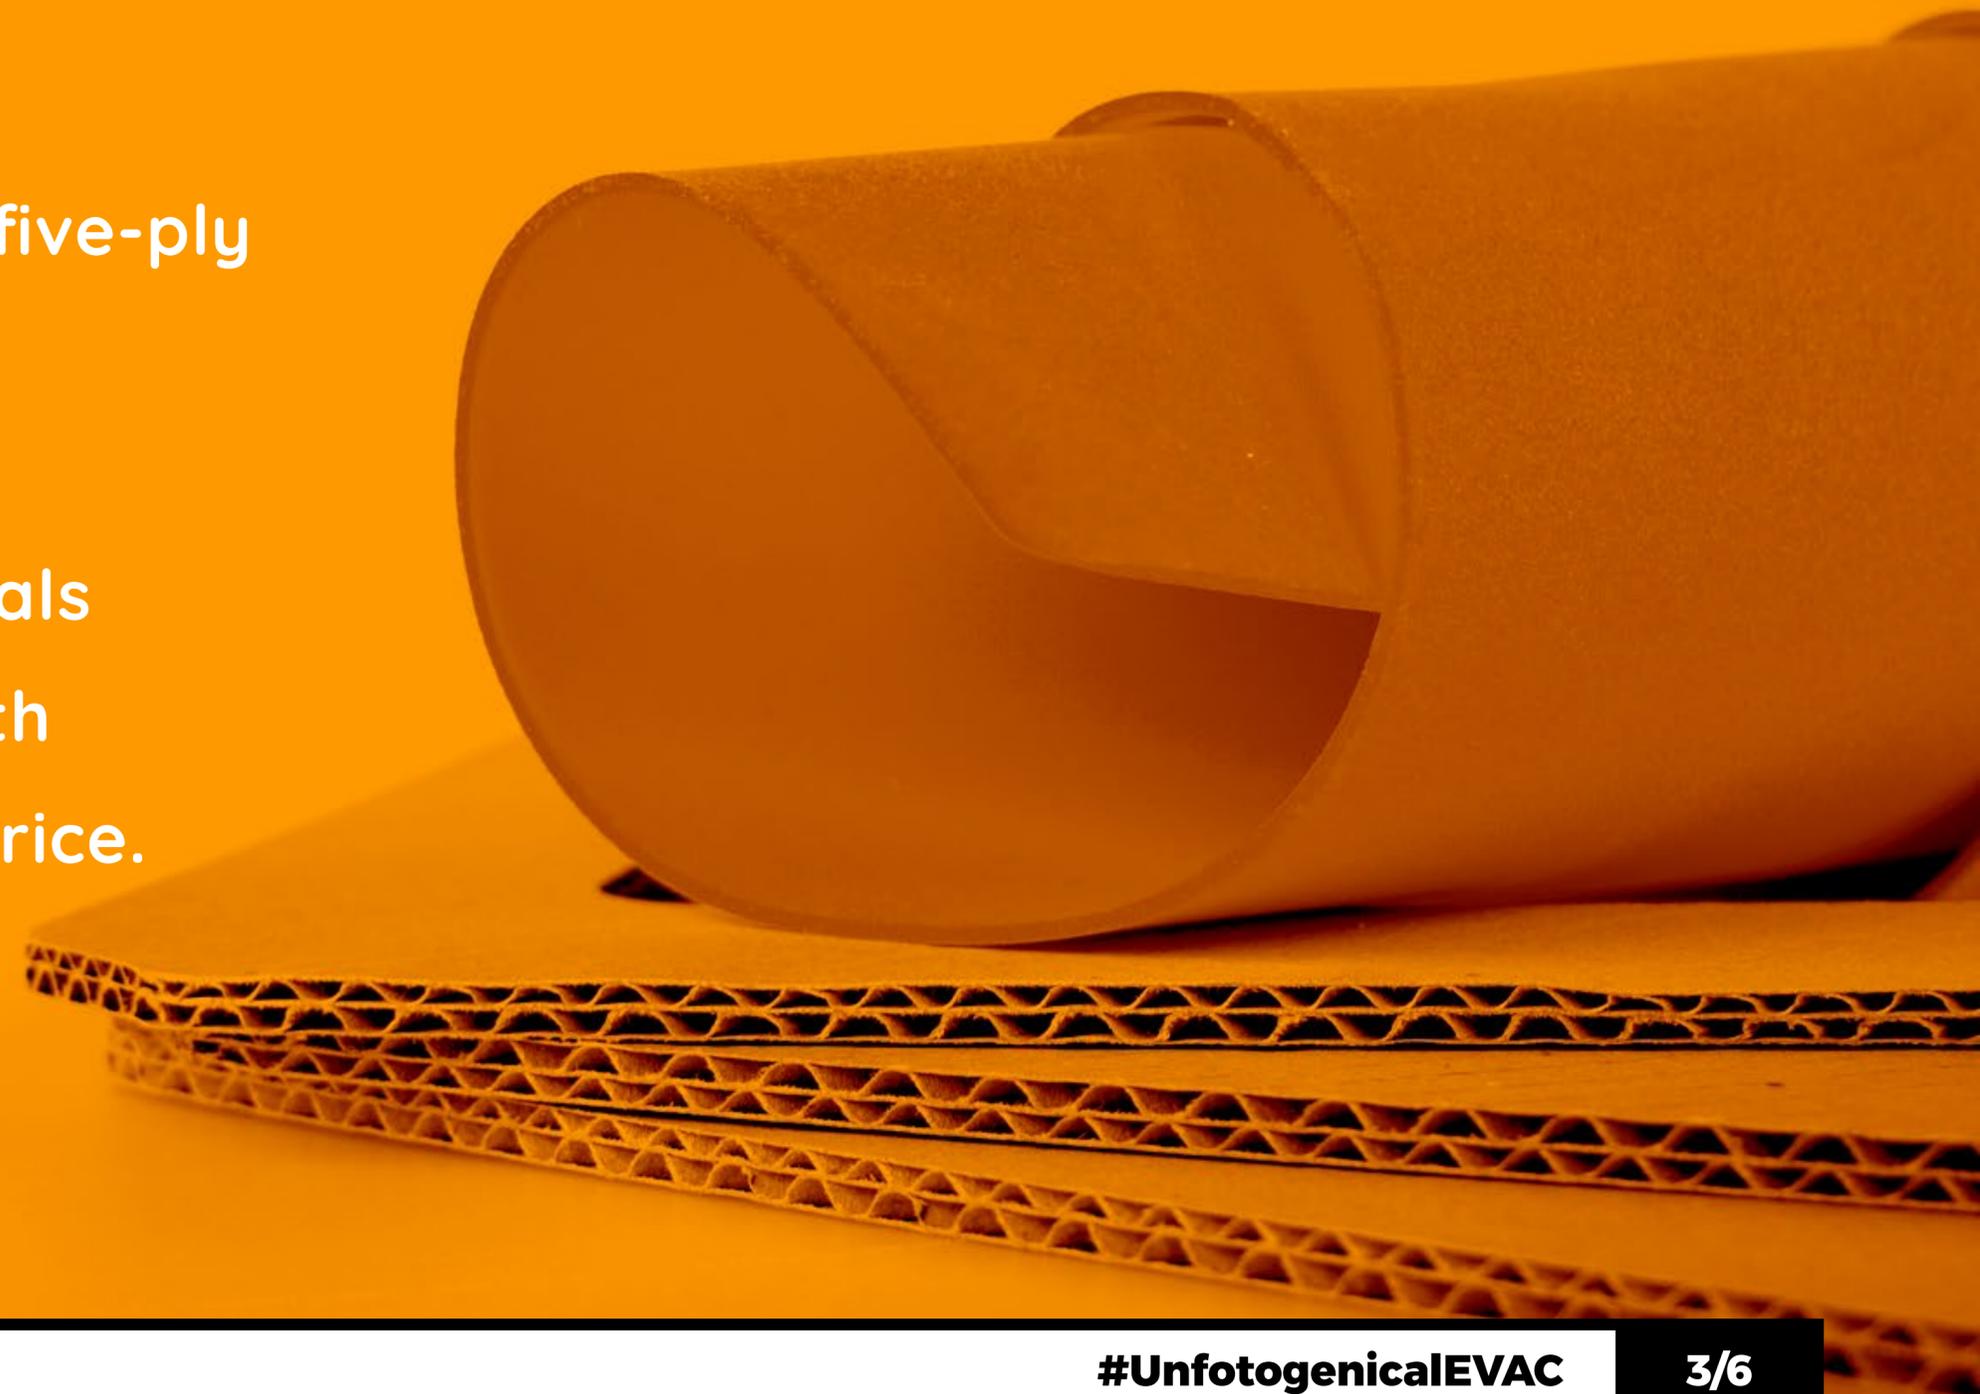

Product presentation

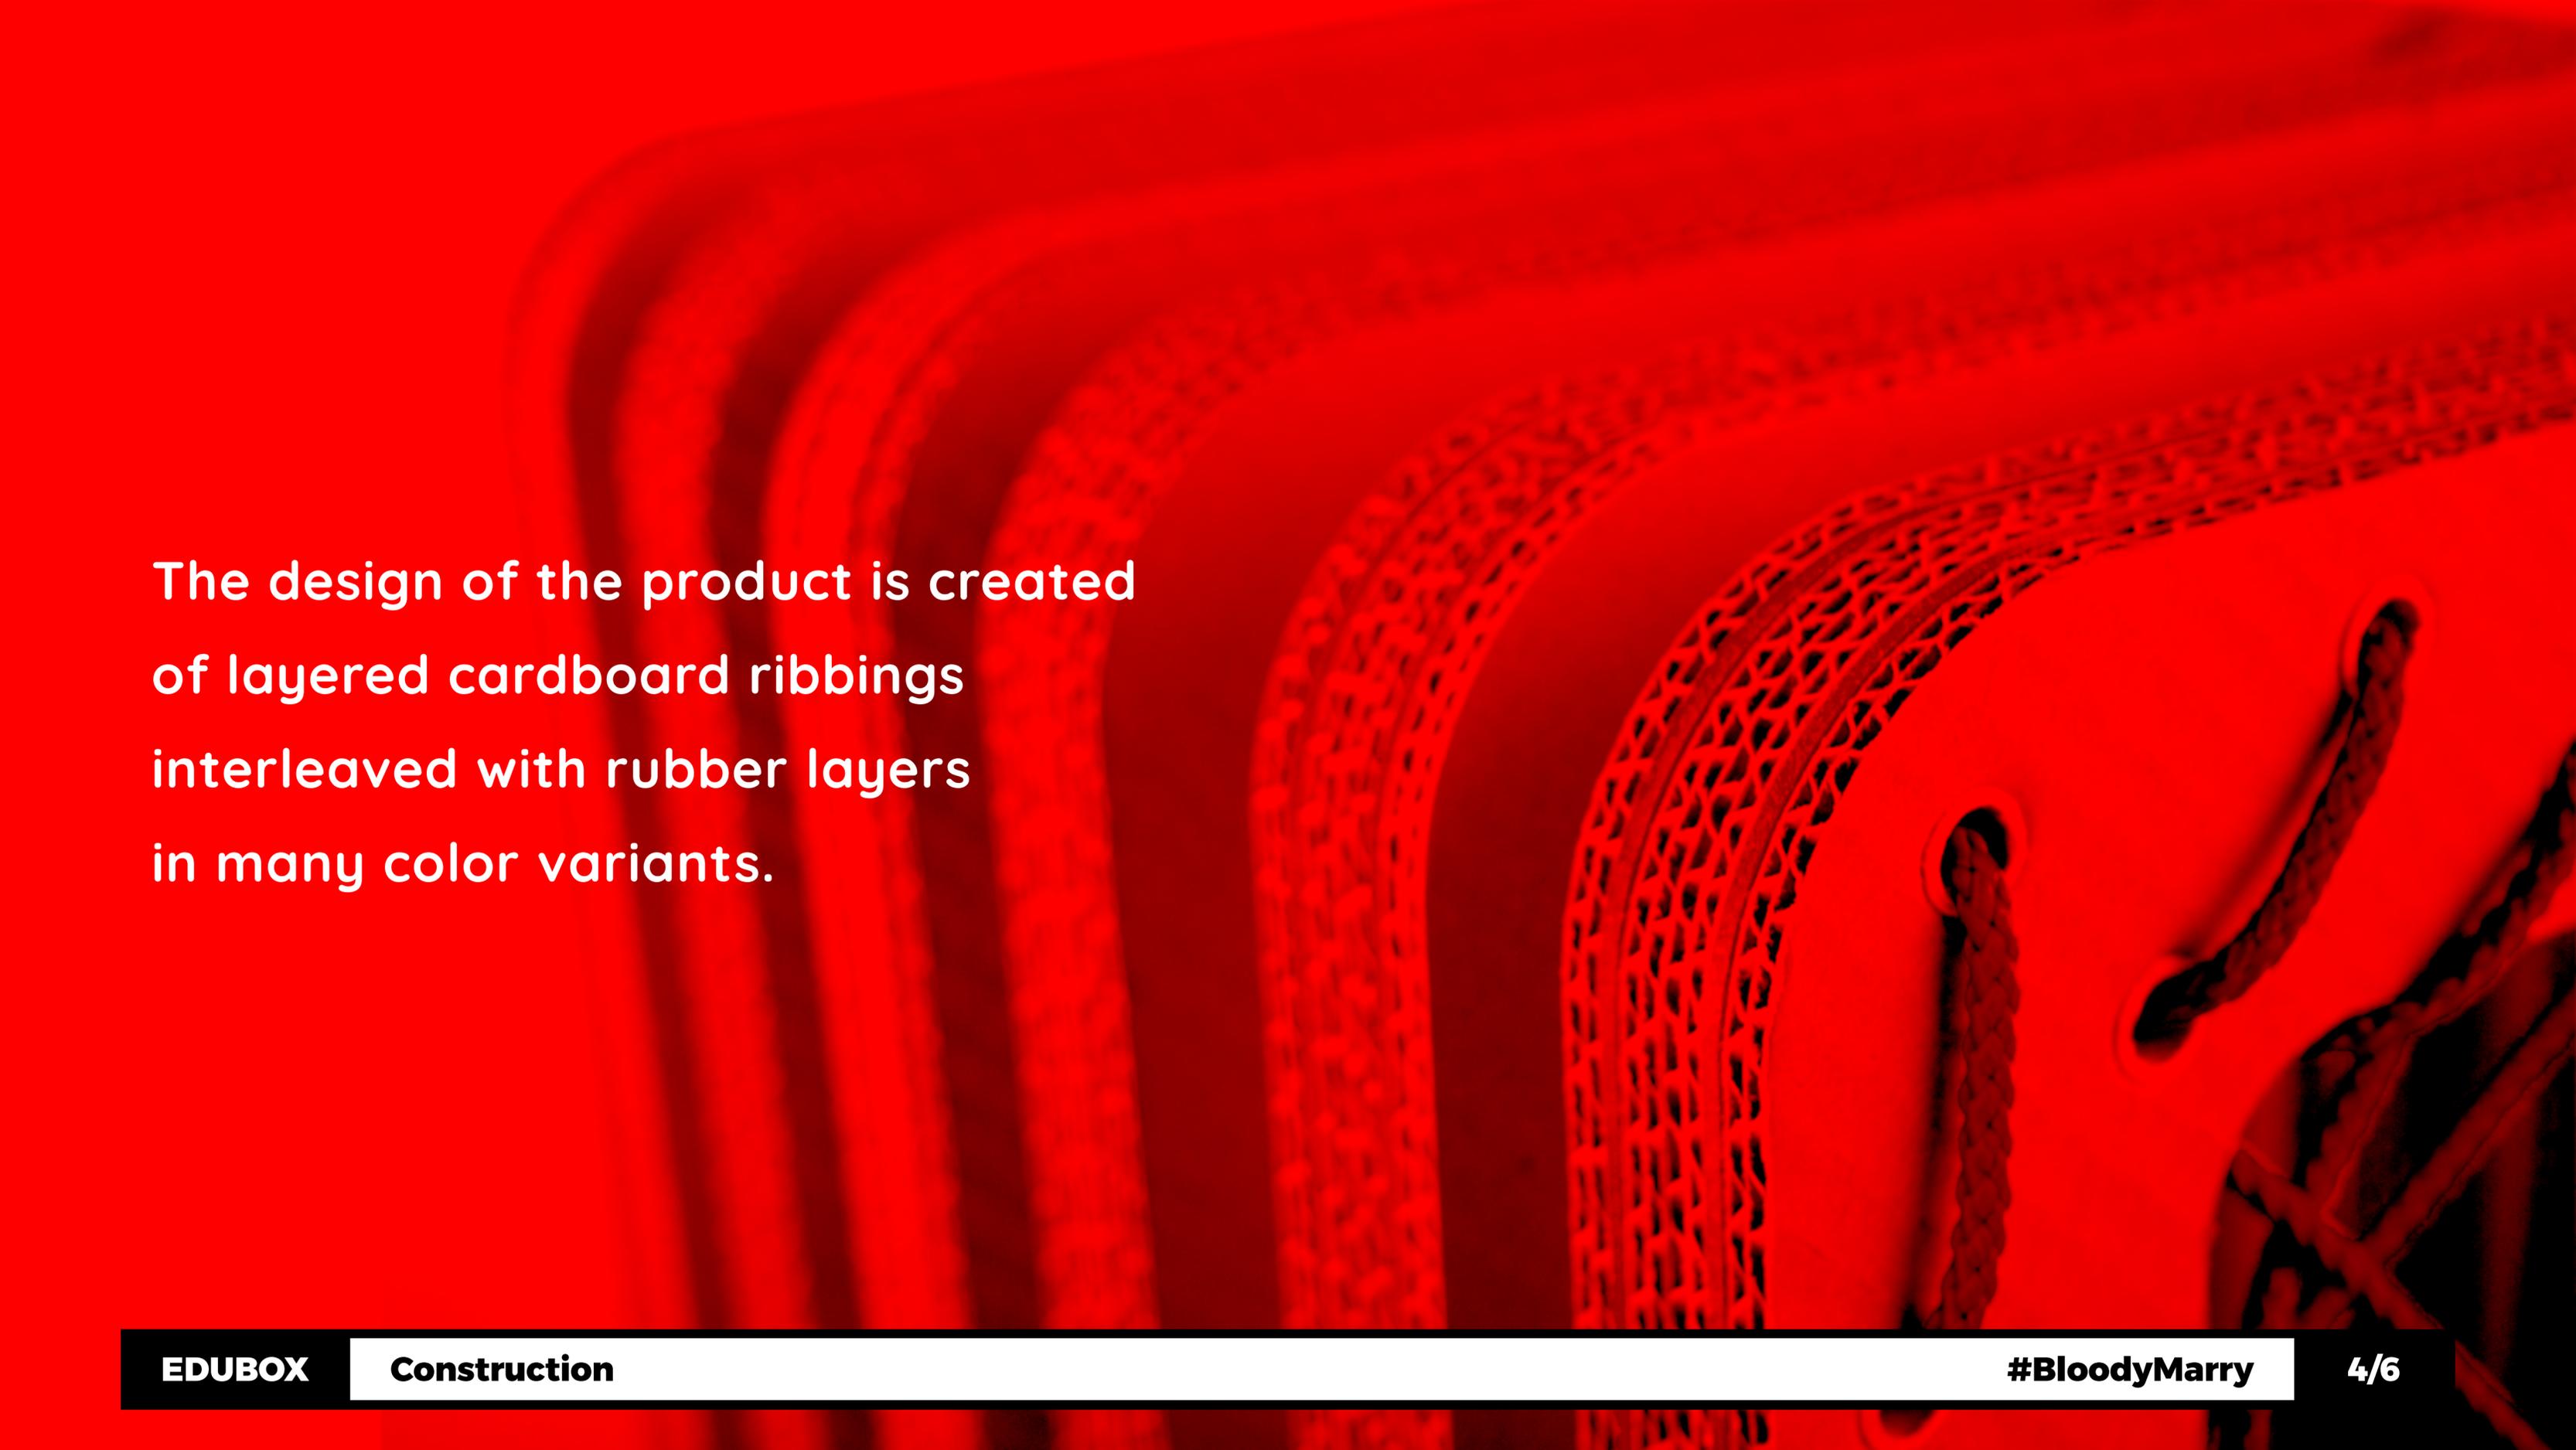

EDUBOX

Seating box with playable features and storage space for pre-school children.

EDUBOX is made of high-quality five-ply cardboard, EVAC foam layers and cardboard tubes.

The combination of these materials guarantees lightness and strength of the product at an affordable price.

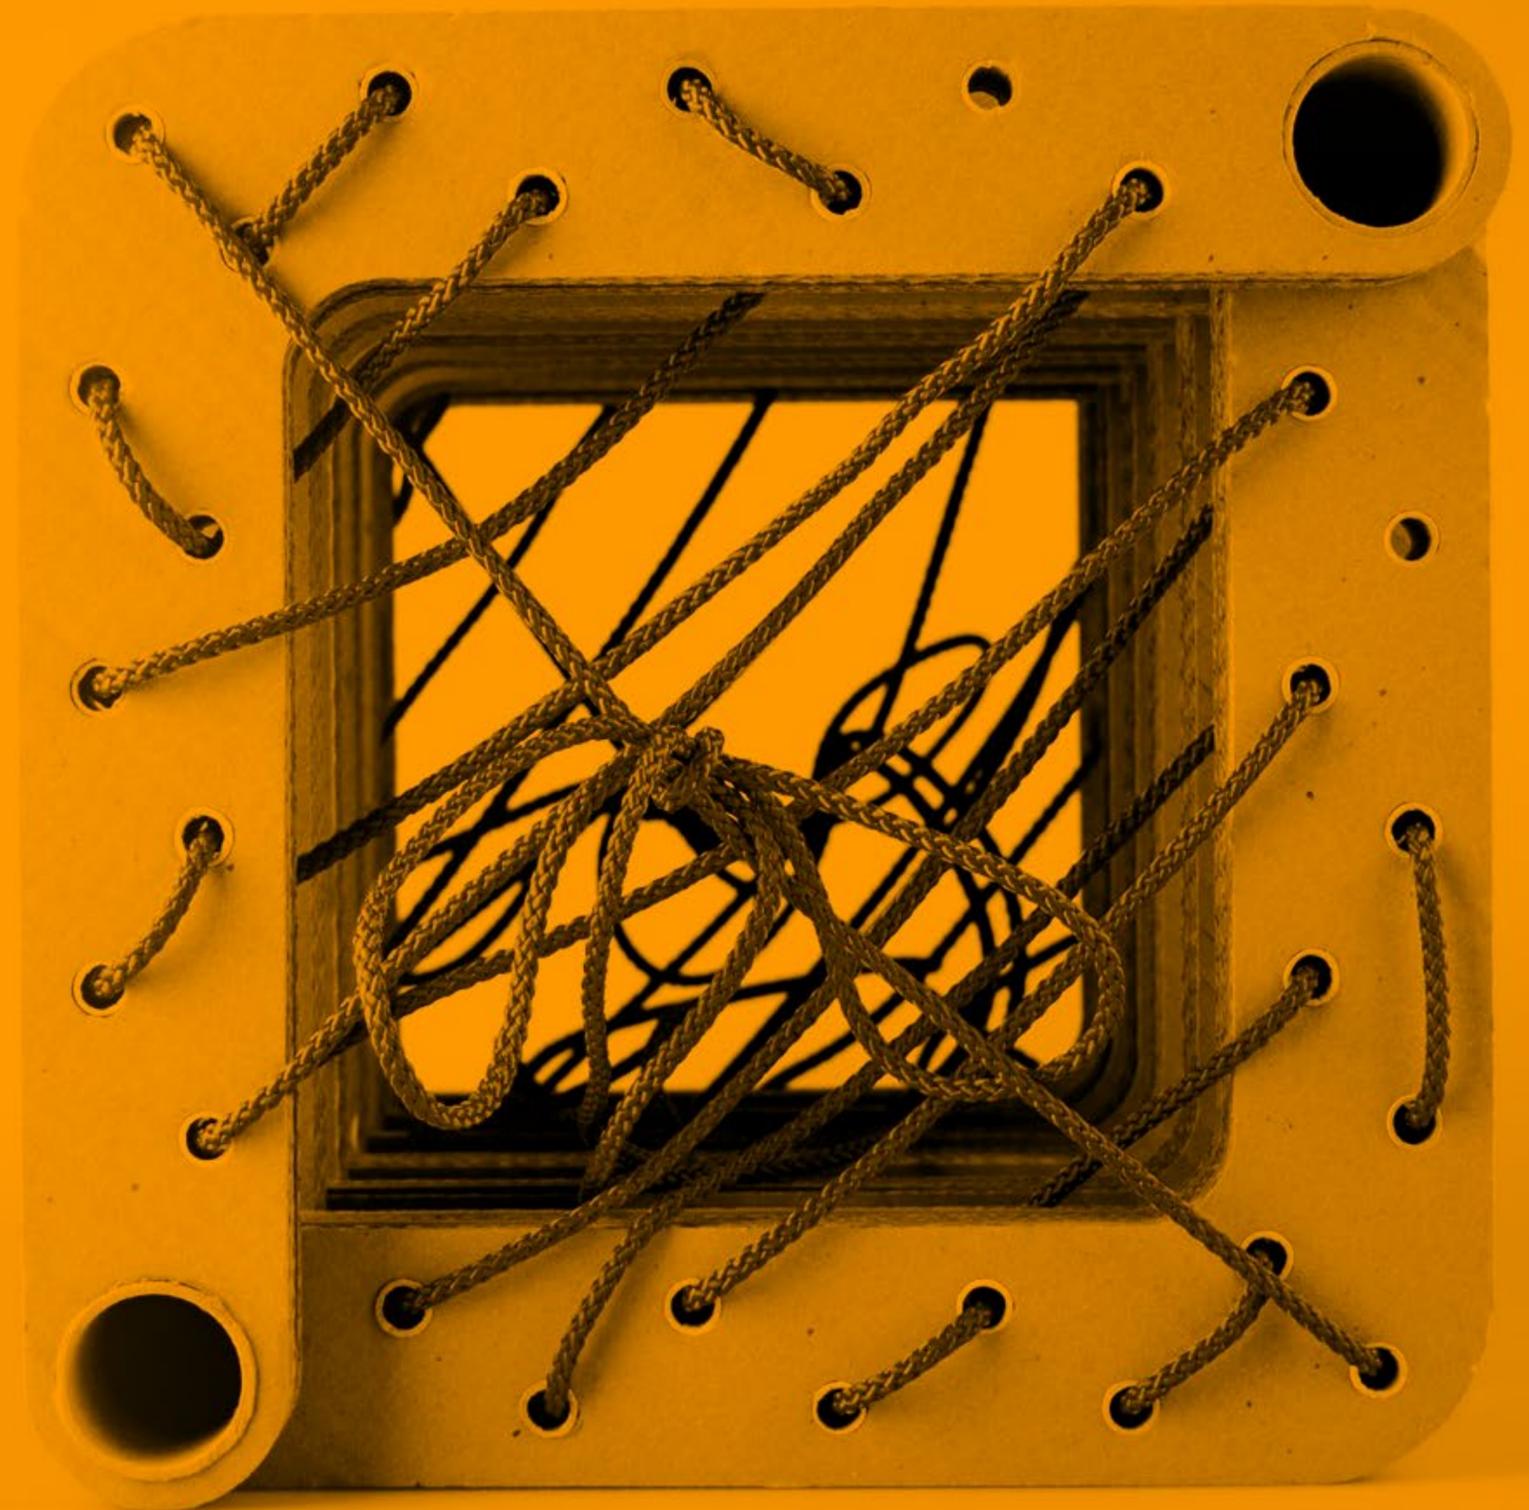

The design of the product is created of layered cardboard ribbings interleaved with rubber layers in many color variants.

The ribs are firmly connected by cardboard tubes. The front and back of the box include laces - playable feature that develops child fine motorics.

Edubox's dimensions are compact, tailored to children's ergonomics. It also provide large space inside the structure for store toys.
